BALANCE

a dynamic state of equilibrium

BALANCE

Achieving and maintaining balance is essential for the well-being of our planet, our society, and ourselves. Our natural world provides the model: vast ecosystems that have evolved over millions of years to create symbiotic relationships that are in balance. Balance is needed for our earth, our communities, and our families, but how do we achieve it?

August 16-25 Citywide

Most programs are free, open to the public, and do not require RSVP unless otherwise specified (*). For the most current program information and schedule visit designinpublic.org.

All programs are open to families and attendees of all ages unless otherwise specified due to adult content or a 21+ venue. For accessibility to all Festival programming, please visit designinpublic.org.

For ASL interpretation or ESL translation, please contact info@designinpublic.com at least five days prior to your desired event.

* DESIGN CRAWL HUBS ARE LISTED IN CORAL.
